What's New with Cisco Connection Documentation, Enterprise Series CD-ROMs

November 1996

This document lists the additions and revisions to the Cisco Connection Documentation, Enterprise Series CD-ROMs made since the last release. It is divided into three sections: "New Documents," "Revised Documents," and "Getting Assistance."

Note Reinstall the Cisco documentation CD software each time you receive a new issue of the CDs to ensure that you are always running the latest version.

New Documents

The following documents appear on the Cisco documentation CDs for the first time:

- *Cisco 1600 Series Routers Installation and Configuration Guide*

This document describes features and functionality of the Cisco 1600 series routers, a series of small routers that provide Internet or central office access for users at home or in small/remote office sites. Chapter topics include installing router hardware, configuring router software, ordering an ISDN BRI line, and troubleshooting the router. The document is located under Cisco Product Documentation: Access Servers and Access Routers: Modular Access Routers: Cisco 1600 Series Routers: Cisco 1600 Series Router Installation and Configuration Guide.

- *Installing the ISDN BRI S/T WAN Interface Card in a Cisco 1600 Series Router*

This configuration notes describes how to install the ISDN BRI S/T WAN interface card in any of the Cisco 1600 series routers. This configuration note appears in Cisco Product Documentation: Access Servers and Access Routers: Modular Access Routers: Cisco 1600 Series Routers: Cisco 1600 Series Routers Configuration Notes: Installing the ISDN BRI S/T WAN Interface Card.

- *Installing the ISDN BRI U WAN Interface Card in a Cisco 1600 Series Router*

This configuration note describes how to install the ISDN BRI U WAN interface card in any of the Cisco 1600 series routers. This configuration note is located under Cisco Product Documentation: Access Servers and Access Routers: Modular Access Routers: Cisco 1600 Series Routers: Cisco 1600 Series Routers Configuration Notes: Installing the ISDN BRI U WAN Interface Card.

- *Upgrading the DRAM SIMM in the Cisco 1600 Series Routers*

This document describes the process for upgrading the DRAM SIMM in any of the Cisco 1600 series routers. This document is located under Cisco Product Documentation: Access Servers and Access Routers: Modular Access Routers: Cisco 1600 Series Routers: Cisco 1600 Series Routers Configuration Notes: Upgrading the DRAM SIMM in Cisco 1600 Series Routers.

- *Regulatory Compliance and Safety Information for Cisco 1600 Series Routers*

This document includes all regulatory and safety information, including translated safety warnings, for the Cisco 1600 series routers. This document is located under Cisco Product Documentation: Access Servers and Access Routers: Modular Access Routers: Cisco 1600 Series Routers: Regulatory Compliance and Safety Information for the Cisco 1600: Regulatory Compliance and Safety Information for Cisco 1600 Series Routers.

- *ClickStart for Cisco 1600 Series Routers*

This document describes using ClickStart to configure Cisco 1600 series routers so you can connect a small office or home office PC to the Internet or another network. This document is located under Cisco Product Documentation: ClickStart Router Configuration and Monitoring: ClickStart for Cisco 1600 Series.

Revised Documents

The following documents have appeared on a prior version of the Cisco documentation CDs but are now revised:

- *CiscoWorks User Guide*

This document explains how to use CiscoWorks 3.2 on the SunNet Manager (SNM) and HP OpenView (HPOV) platforms. This document discusses fault management, performance management, device configuration and management, and database administration. It also contains information about setting up domains and securing applications. CiscoWorks 3.2 includes an online help system, upgraded NETSYS integration, and new features such as CiscoWorks Toolbox. This release supports Cisco IOS Release 10.3 software and an upgrade to Sybase 10.1. This document is located under the following paths:

- Cisco Product Documentation: Network Management: CiscoWorks 3.2
- Cisco Product Documentation: Network Management: CiscoWorks 3.0.3

- *Release Notes for Cisco IOS Release 11.1*

This release note has been revised to support Maintenance Release 11.1(7) as well as earlier releases. This document is located under Cisco Product Documentation: Cisco IOS Software Configuration: Cisco IOS Release 11.1.

- *Cisco 200 for DOS, Windows 3.1, and Windows for Workgroups 3.11 User Guide*

This document was revised to improve the software installation procedure and the example connecting router configurations. In addition, the hardware installation procedure has been removed. Hardware installation and configuration procedures are now described in a separate document.

This document appears under Cisco Product Documentation: Access Servers and Access Routers: Cisco 200 ISDN Products: Cisco 200 for DOS and Windows 3.x User Guide.

- *Cisco 200/CiscoPro CPA2000 Public Network Certification*

This publication was revised to update information on the public network certification of the Cisco 201 and Cisco 202 ISDN Adapters. This document appears under Cisco Product Documentation: Access Servers and Access Routers: Cisco 200 ISDN Products: Cisco 200/CiscoPro CPA200 Public Network Certification.

- *Router Products Release Notes for Cisco IOS Release 10.3*

This document has been revised to support Maintenance Release 10.3(16) as well as earlier releases. Release 10.3(16) is a Generally Deployable (GD) software release. This document is located under Cisco IOS Software Configuration: Cisco IOS Release 10.3.

- *Router Products Release Notes for Cisco IOS Release 11.0*

This document has been revised to support Maintenance Release 11.0(12) as well as earlier releases. Release 11.0(12) is a Generally Deployable (GD) software release. This document is located under Cisco IOS Software Configuration: Cisco IOS Release 11.0.

Getting Assistance

To report a problem with the Cisco Connection Documentation, Enterprise Series CD-ROM or to receive technical support, contact the Technical Assistance Center between 5:00 a.m. and 6:00 p.m. Pacific time, Monday through Friday (excluding company holidays).

U.S. Technical Assistance Center numbers:

800 553-2447

Fax: 408 526-8898

408 526-7209

E-mail: tac@cisco.com

Cisco Systems and its European Service Partners coordinate all customer service in Europe, including hardware and software telephone technical support, onsite service, and module exchange and repair. For more information, contact the European Technical Assistance Center.

European Technical Assistance Center numbers:

32 2 778 42 42

Fax: 32 2 778 43 00

E-mail: euro-tac@cisco.com
