

# ClickStart for Cisco 1601 Routers for an Asynchronous Serial Connection

---

These pages describe how to use ClickStart to configure a Cisco 1601 router for asynchronous serial line so you can connect a small office or home PC to the Internet or another network.

## Configuring the Router

To configure a Cisco 1601 router for an asynchronous serial connection, follow these links:

- [Understand How ClickStart Works.](#)
- [Order Asynchronous Serial Service.](#)
- [Prepare to Configure an Asynchronous Serial Connection.](#)
- [Click on the platform you are using \(Windows 3.11, Windows 95 PC, UNIX workstation, or Macintosh\).](#)
- [Set Up the Router.](#)
- [Configure the Router.](#)
- [Test Your Router's Configuration.](#)

If you have comments, send e-mail to [cs-html@cisco.com](mailto:cs-html@cisco.com).
