ClickStart for Configuring Cisco 1602 Routers

Using ClickStart, you can configure a Cisco 1602 routers so you can connect a small office or home PC to the Internet or another network.

Note Currently, ClickStart supports only PPP encapsulation. Support for Frame Relay encapsulation will be a future enhancement.

From the following list, select the WAN technology you want to configure:

- ClickStart for Configuring Cisco 1602 for a Leased Line Network
- ClickStart for Configuring Cisco 1602 for a Switched 56-kbps Network
