ClickStart for Configuring Cisco 1603 or Cisco 1604 Routers for ISDN

These pages describe how to use ClickStart to configure a Cisco 1603 or Cisco 1604 router for ISDN so you can connect a small office or home PC to the Internet or another network.

Configuring the Router

To configure a Cisco 1603 or Cisco 1604 router for ISDN, follow these links:

- Understand How ClickStart Works.

- Order ISDN Service.

- Prepare to Configure an ISDN Router.

- Click on the platform you are using (Windows 3.11 PC, Windows 95 PC, UNIX workstation, or Macintosh).

- Set Up the Router.

- Configure the Router.

- Test Your Router's Configuration.
