

# ClickStart Home Page

---

Using ClickStart, you can configure a Cisco 1600 series router so you can connect a small office or home PC to the Internet or another network.

When you have successfully completed ClickStart's initial configuration form, your router can be managed from a central location, and fine-tuning or upgrades can be performed remotely.

From the following list, select the Cisco 1600 series router you want to configure:

- [ClickStart for Configuring Cisco 1601 Routers](#)
- [ClickStart for Configuring Cisco 1602 Routers](#)
- [ClickStart for Configuring Cisco 1603 or Cisco 1604 Routers for ISDN](#)
