ClickStart Home Page

ClickStart lets you configure a Cisco 700 router for ISDN.

These pages describe how to configure a router so you can connect a small office or home PC to the Internet or another network. To configure your router using ClickStart, you do not need to learn all about networks and routers.

Configuring the Router

To configure a Cisco 700 series router for ISDN, follow these links:

- Understand How ClickStart Works.
- Order ISDN Service.
- Click on the platform you are using (Windows 3.11 PC, Windows 95 PC, or Macintosh).
- Set Up the Router.
- Configure the Router.
