

# Foreword

---

These are the Release Notes for software Release 2.0.7 of the LightStream 2020 enterprise ATM switch. These notes are organized into three chapters as follows:

- New Features and Enhancements — Describes new features of Release 2.0.7 and new enhancements to existing features.
- Software Upgrade Notes — Describes how to determine the software release presently installed on the system hard disk. Describes how to upgrade your software to Release 2.0.7. Discusses disk utilization.
- Special Considerations — Describes special considerations for Release 2.0.7 of the LightStream 2020 product.

Release 2.0.7 node software is a new base release and supersedes base release 2.0.3 node software (with or without upgrades 2.0.5 and 2.0.6) and all prior releases.
