

About This Guide

This section discusses the objectives, audience, organization, and conventions of the *Cisco Internet Junction User Guide*.

All Cisco technical documentation and additional literature are available on UniverCD, Cisco's online library of product information. UniverCD is updated and shipped monthly, so it might be more up to date than printed documentation. UniverCD is available both as a single CD and as an annual subscription. To order UniverCD, contact your local sales representative or call customer service.

Document Objectives

This publication introduces Cisco Internet Junction software and describes its installation and operation.

Audience

This publication was written for system administrators who are familiar with the concepts of network software and have experience installing software on personal computers and running IPX networks.

Document Organization

This guide is organized as follows:

- Chapter 1, “Overview of Cisco Internet Junction,” describes Cisco Internet Junction and its security features.
- Chapter 2, “Installing a Cisco Internet Junction Gateway,” provides instructions for installing and verifying Cisco Internet Junction gateway software.
- Chapter 3, “Installing a Cisco Internet Junction Client,” provides instructions for installing and verifying Cisco Internet Junction client software.
- Chapter 4, “Advanced Configuration of Cisco Internet Junction,” describes how to change and view the configuration of Cisco Internet Junction.
- Appendix A, “Applications Certified for Use with Cisco Internet Junction,” lists applications that have been tested with Cisco Internet Junction software.
- Appendix B, “Troubleshooting Cisco Internet Junction,” contains suggestions for solving installation problems at the gateway and client.
- Appendix C, “Cisco Internet Junction Error Messages,” lists Cisco Internet Junction error messages and recommended actions.

Document Conventions

This publication uses the following conventions to convey instructions and information:

Command descriptions use these conventions:

- Commands and keywords are in **boldface** font.
- Variables for which you supply values are in *italic* font.
- Elements in square brackets ([]) are optional.
- Alternative but required keywords are grouped in braces ({ }) and are separated by a vertical bar (|).

Examples use these conventions:

- Terminal sessions are in `screen` font.
- Information you enter is in **boldface** `screen` font.
- Nonprinting characters are shown in angle brackets (< >).
- Information the system displays is in `screen` font, with default responses in square brackets ([]).

Note Means *reader take note*. Notes contain helpful suggestions or references to materials not contained in this manual.

Timesaver Means the described action saves time. You can save time by performing the action described in the paragraph.
