

## References and Recommended Reading

---

This appendix lists other documents that you might find helpful in your management of CiscoSecure UNIX Server software.

- CiscoSecure UNIX Server User Guide Release Notes

For more information about router software configuration, refer to the following publications for Cisco IOS Release 11.0 and earlier:

- *Internetworking Technology Overview*
- *Router Products Configuration Guide*
- *Router Products Command Reference*
- *Configuration Builder Getting Started Guide*
- *CiscoWorks for Windows Getting Started Guide*
- *Troubleshooting Internetworking Systems* (as needed)

For Cisco IOS Release 11.1 and later, refer to the following publications:

- *Configuration Fundamentals Configuration Guide*
- *Configuration Fundamentals Command Reference*
- *Remote Node and Terminal Services Configuration Guide*
- *Remote Node and Terminal Services Command Reference*
- *Wide-Area Networking Configuration Guide*
- *Wide-Area Networking Command Reference*
- *Standard Network Protocols Configuration Guide*

- 
- *Standard Network Protocols Command Reference*
  - *Network Protocols Configuration Guide*
  - *Network Protocols Command Reference*

These publications are available on UniverCD, Cisco's online library of product information. To order UniverCD, or paper documentation, refer to the *Cisco Information Packet* publication that accompanied your router.

For more information about the protocol that helps govern CiscoSecure UNIX Server software, refer to the following documents (not published by Cisco):

- TACACS+ API Specification, Version 1.30
- TACACS+ Protocol Specification, Version 1.58
- REGEXP.3 man page (UNIX SED man page)
- RFC1334, PPP Authentication Protocols
- RFC1661, The Point-to-Point Protocol (PPP)
