

Glossary

AIT	ATM Internetworking Trunk card (T3 interface)
ANI	Automatic Number Identification
AXIS	Broadband ATM Service Interface Shelf.
BNI	BPX Network Interface card (T3 interface)
BPX-BIS	BPX interface shelf
BPX-CSS	Core Switch shelf
BRAM	B
BRI	Basic Rate Interface
BSC	AXIS Shelf Controller
CDR	Call Detail Recording
Client	Software components that access a centralized service or data repository.
CM	Call Manager (process)
CP	Call Process
Database	StrataView Plus Informix database
DLCI	Data Link Connection Identifier
FR	Frame Relay
FRP	Frame Relay Port
FRAD	Frame Relay Access Device
FRSM	Frame Relay Service Module
FR	Frame Relay
GUI	Graphical User Interface
HP/OV	HP OpenView

INS/DAS	Intelligent Network Server / Dial Access Server
IP	Internet Protocol family (internetwork) datagram delivery protocol
ISDN	Integrated Services Digital Network
LAP-D	Link Access Procedure for D Channel
Link0 and Link1	The existing proprietary protocol layer between StrataView Plus and an IPX/BPX network
NMS	StrataView Plus Network Management System
PDU	Protocol Data Unit
PING	ICMP (Internet Control Message Protocol) echo request message.
PRI	Primary Rate Interface
PVC	Permanent Virtual Circuit
Routing Domain	The inner layer in the tiered network architecture.
SCM	Statistics Control Manager
SNMP	Simple Network Management Protocol
SVC	Switched Virtual Circuit
Tiered Network	The two level network where the higher level consists of routing nodes and the lower level consists of individual BPX Interface Shelves.
WingZ	The spreadsheet application from Informix used for StrataView Plus Statistical Reporting.
